## Search Notes

Examiner McGarry,

Here are the results of the search you requested.

Please feel free to contact me if you have any questions.

**Edward Hart** 

Pending Nucleic Acid and Pending Amino Acid database searches generate two sets of results each. The Pending databases have been split-into two parts to reduce the amount of time required for their daily updates. This results in more machine time being available for processing searches. Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions

.rnpm and .rnpn

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions .rapm and .rapn

Because they contain data that is confidential, the results of Pending database searches should not be left in the case.
